HARSHIT RAVI

AI & ML Engineer

8867562047 ◆ harshitraviofficial01@gmail.com ◆ Bengaluru, India ◆ Email ◆ LinkedIn ◆ GitHub ◆ Google Dev

PROFESSIONAL SUMMARY

AI & ML Engineer with an ability to translate complex data into impactful, scalable solutions. Expertise in AI, ML, and DL facilitates the development of projects such as Food Waste Management, Auto-shelf Restocker, TensorFlow-based applications, and a mental health risk analyzer. Offers proficiency in Python, LLMs, and strong problem-solving skills to guarantee rapid value delivery without loss in quality. Committed to exploring undiscovered domains in computer science and continuous learning through technical research and project implementation.

WORK EXPERIENCE

Data Analyst Intern - BLP Industry.AI Jan 2026 - Mar 2026
Bengaluru, India (Remote)

- Performed YOLO model development and data preparation for large-scale companies such as Royal Enfield and Asian Paints, increasing detection accuracy by 10%.
- Prepared 1 distinct dataset and analyzed the workflow of major AI models, streamlining development processes and saving 15% of development time.

UI/UX Designer - Thryvv India Jun 2025 - Aug 2025
Bengaluru, India

- Developed a mobile app for a startup providing body recovery options such as ice dip and red light therapy, currently supporting 5-6 users in the building phase.
- Focused on user interface and experience design while applying core UI/UX principles, resulting in a 20% increase in user engagement.

EDUCATION

New Horizon College 2023 - 2027
Bachelor of Engineering, Artificial Intelligence & Machine Learning, 7.8 Bengaluru, India

- CGPA: 7.8

New Horizon PU College, Kasturinagar 2022 - 2023
XII Standard, KSEAB, 7.8 Bengaluru, India

- CGPA: 7.8

Aavishkar Academy, Ulsoor 2021 - 2022
X Standard, ICSE, 9.3 Bengaluru, India

- CGPA: 9.3

SKILLS & INTERESTS

Languages: C/C++, Python, JavaScript, HTML+CSS, Java

Libraries & Frameworks: OpenCV, TensorFlow, PyTorch, YOLO, Node.js

Tools: VSCode, Git, GitHub, Docker

Relevant Coursework: DSA, Computer Vision, Data Visualization, DBMS, Docker

Soft Skills: Problem Solving, Presentation, Public Speaking, Leadership

Interests: Software Engineering, AI & ML Engineering

PROJECTS

Mental Health Risk and Behavioural Analyser

- Built and presented an AI-powered mental health tracker to 2 stakeholders, generating detailed analysis reports to identify potential mental illnesses via a scoring system.
- Provides suggestions on potential mental health conditions with 98% accuracy and recommends therapists when severity is detected.

Dolge TTS Video creator website Dolge

- Developed a text-to-speech and video generation pipeline, successfully creating 50 story time videos by integrating custom voice-overs with uploaded visual content.
- Used the Edge TTS for creating text-to-speech audios and FFmpeg for video manipulation and captions
- The expected output is a video with a background video playing with an voiceover of the story and captions in the video of the same story

Smart Mirror – AI Interactive Compliment Mirror

- Led hardware integration for an AI-powered mirror, conducting 15 hours of testing to detect 100+ solo/group visitors via webcam and deliver personalized spoken responses.
- Wired webcam, speaker, and sensors, dedicating 20 hours to developing the Python-based face-detection and text-to-speech pipeline.

Auto Shelf Restocker

- Built a computer vision system using OpenCV and YOLO to analyze shelf images, achieving 90% accuracy in detecting missing inventory items.

- Automated restocking notifications via messages for 3 restaurants and markets, improving restocking efficiency by 60% during the prototype phase to maintain steady supply.

Food Waste Management

- Designed a machine learning system to reduce restaurant food wastage by analyzing 10 distinct synthetic datasets, currently in the development phase.
- Provided predictive insights for inventory control and sustainability, currently in the development phase for restaurant applications.

CERTIFICATIONS

AWS and Cloud Services - Great Learning

Computer Vision - NPTEL

Machine Learning - NPTEL

ACHIEVEMENTS

Hackathon Participation - CMRIT

Hackathon Participation - ISRO

Hackathon Participation - SIH (Smart India Hackathon)
